Introducing PC Deposit

Deposit Checks Directly From Your Office PC

Improve productivity and your bottom line with Southern Commercial Bank's Internet-based PC Deposit. With PC Deposit you save time and money. We provide the scanner and the software.

System Requirements: PC with Windows 2000 or XP operating system, a USB port and a high-speed Internet connection.

Safe and Secure

Run your checks through our desktop scanner. The image of the front and back of the check is stored on your hard drive. Your deposit is sent over a secure and encrypted Internet connection.

New Technology Makes It Easy

You will receive a deposit acknowledgement immediately. An e-mail confirmation will be delivered overnight showing not only images of your scanned deposits but all activity on your account from the previous day. The e-mail confirmation can be sent to more than one e-mail address for dual control and fraud prevention.

We provide set up and training

In less than an hour, you will be making deposits from your desk.
